

# CUSTOMISATION

## YOUR COMPANY LOGO

The Laser Etching service on the datAshur is accomplished by laser engraving your text and or logo on to the sleeve or the side of the drive, which is performed in-house by the iStorage Design Team.

This service is useful for corporate branding and lost & found information.

No minimum order quantity required.

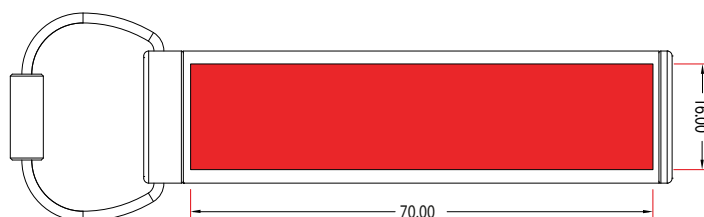

## LASER ETCHING

The diagram below shows the available space for your desired graphics.

The **BLUE** area is on the side of the device itself whereas the **RED** is on the sleeve of the device.

Graphics need to be provided in either Adobe Illustrator (.ai), Encapsulated Post Script (.eps) or Scalable Vector Graphics (.svg) format.
