iSTORAGE DISKGENIE Portable Hard Drive, 250 GB, £79 plus VAT, marketed by iStorage Ltd, Research House, Fraser Road, Greenford, UB6 7AQ, purchasable online via *www.istorage-uk.com*

In the overcrowded storage hardware market, this ingenious device stands out for its high level of security, elegant design, and ease of use. It comes with real time 128 or 256-bit AES hardware encryption and a built-in keypad which provides PIN-controlled access. Connection to a PC is through a simple USB port, and the device does not need any external power supply. No software is required either, and it is compatible with all operating systems (Apple Macs call for reformatting but that is an easy user-friendly process).

Among the other attractions of the iStorage is that it allows multiple users to access the stored information, with provision made for up to 10 unique user IDs. The device is available in capacities of between 250-750 GB and it comes with a three-year warranty covering parts and labour. Lawyers, like other professionals, will find this an invaluable business tool.
